

# Haleema Naeem

Cyber Security Analyst

DHA-V, Islamabad, Pakistan — +923329649388 — haleema090107@gmail.com

## Professional Summary

I am currently a third semester Cyber Security student and I look forward to learning and gain practical experience in the field. I have a basic understanding of cybersecurity concepts and an interest in network security, ethical hacking, and identifying security vulnerabilities. I enjoy learning new technologies, improving my technical skills, and working on challenges that help me grow both personally and professionally. I work well in a team as well as solo.

## Skills

|                                                |          |
|------------------------------------------------|----------|
| <b>Object Oriented Programming</b>             | Beginner |
| <b>HTML</b>                                    | Beginner |
| <b>C++</b>                                     | Beginner |
| <b>CSS</b>                                     | Beginner |
| <b>Communication Skills</b>                    | —        |
| <b>Teamwork &amp; Collaboration</b>            | —        |
| <b>Problem-Solving</b>                         | —        |
| <b>Adaptability &amp; Willingness to Learn</b> | —        |

## Education

**Jun 2021 – Apr 2023**

SSC, APSACS Fort Road Rawalpindi

Science Majors

**Aug 2024 – Jun 2025**

HSSC, APSACS Fort Road Rawalpindi

Pre-Engineering Majors

**Aug 2025 – Jun 2029**

Bachelor of Science in Cyber Security, FAST-NUCES Islamabad

Currently enrolled in 3rd Semester

## Projects

### Tumblepop

Developed a simple 2D TumblePop game in C++ as a university project. Added a main menu, scoreboard, different player and enemy types, and a weapon that can pull enemies inside it. Worked on the game logic, player movement, and other basic game features.

### Wandering Bloom Website

Designed the website layout in Figma and then developed it using HTML and CSS. Created a simple bouquet website with multiple pages, focusing on a clean design, easy navigation, and a user-friendly layout.

### Coding Contest

Developed a coding challenge system in C++ where users could sign up, join contests, and solve programming challenges. Included five different difficulty levels and basic features for managing users, contests, and challenges.

## Research & Writing

### Research Paper — Language as a Medium of Class Difference

Wrote a research paper examining language as a medium through which class differences can be expressed and reinforced.

### **Substack Article — Psychological Effects of Different Teaching Methods on Students**

Write an article for Substack exploring the psychological effects that different teaching methods can have on students.
